

DOWNLOAD MPEG STREAMCLIP — MAC

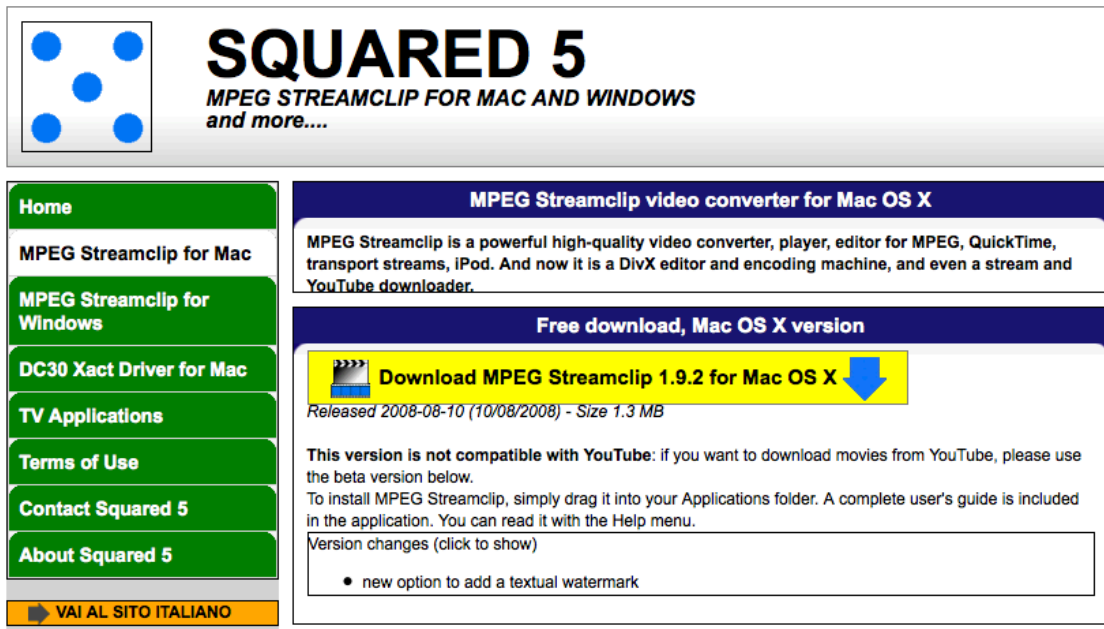

1. Using your favorite web browser, search for **Download MPEG Streamclip**.

2. The website you will download this free product from is www.squared5.com. Make sure you download the MAC version if you are using a Mac.

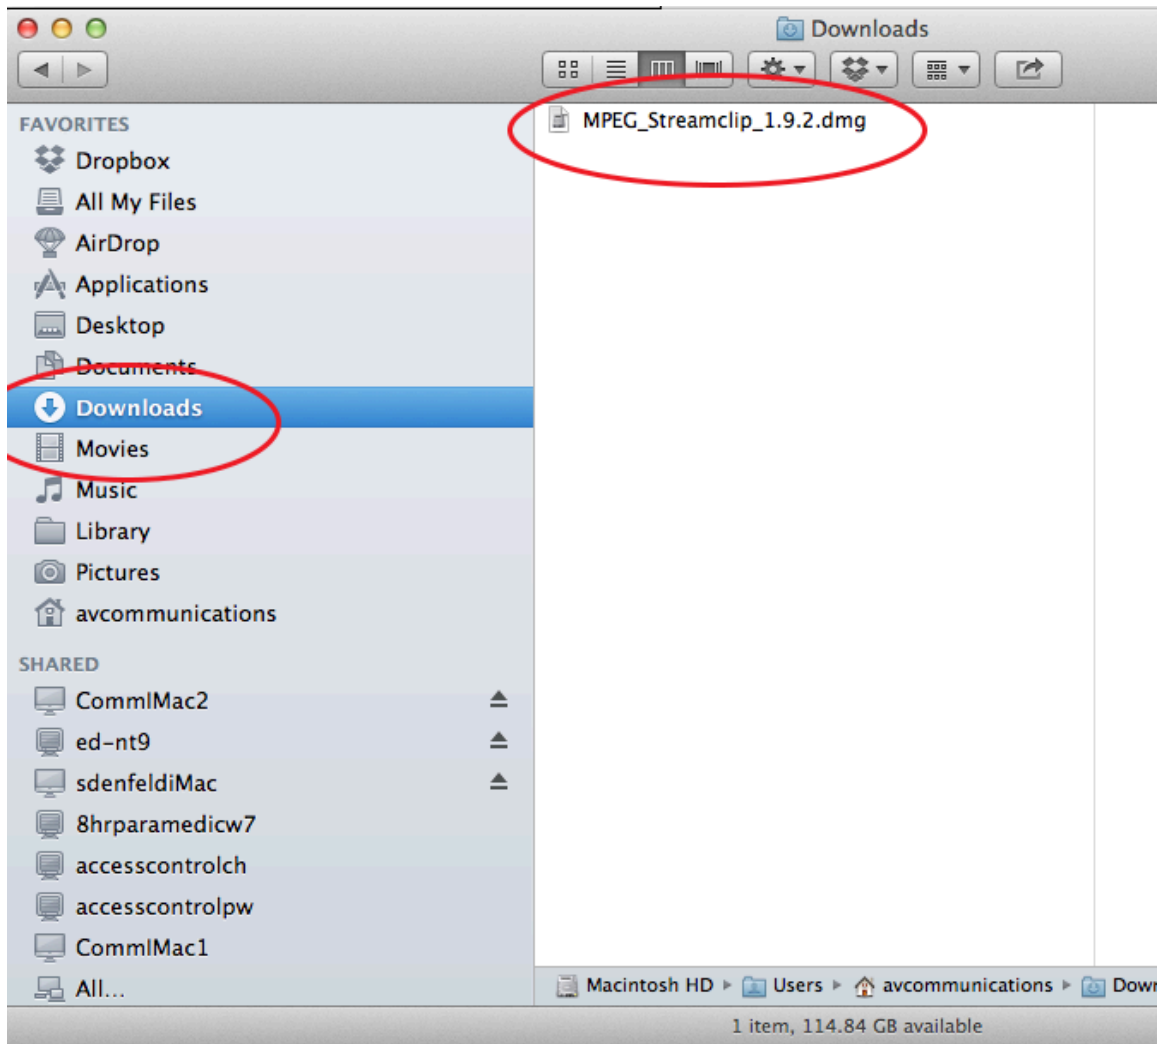

3. You will then be taken to another page that has the link to download MPEG Streamclip for Mac.

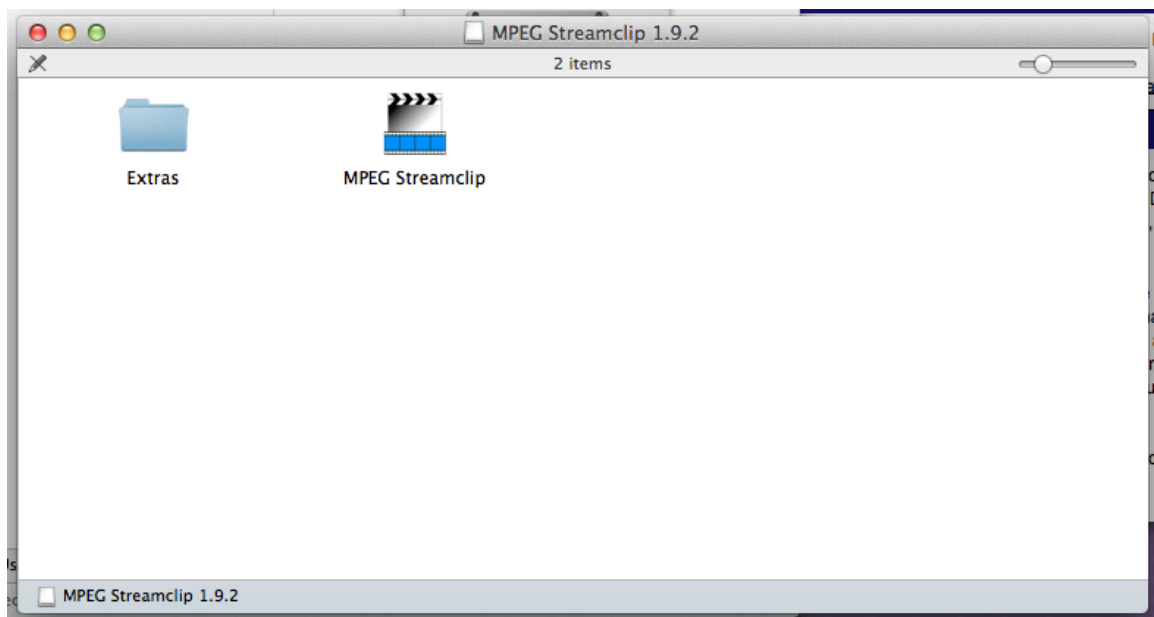

4. You will then be prompted to **Save File**.

5. Navigate to this saved program file. Macs typically saved downloaded files in the **Downloads** directory.

6. Double-click the MPEG_Streamclip file you see in 'Downloads,' (or whatever other directory in which you saved it), and allow the file to unpack. When it is completed, a window will appear containing the MPEG Streamclip icon and an 'Extras' folder containing some additional documentation.

7. Drag the MPEG Streamclip icon to your desktop, (or your dock), for easy access later. Double-click the icon to get started in converting your DVD media to files uploadable for the Edina Playback Facility's FTP server.
